

Nikos Barkas is a geologist with more than 20 years of experience in the Oil and Gas Industry. He holds a BSc in Geology from the University of Athens and a MSc in Computing in Earth Sciences from the University of Keele, UK.

He started his career as Technical Assistant and Geologist for Triton Energy in Greece in 1998. As part of Triton's Exploration Team, he participated in drilling operations in Western Greece and Equatorial Guinea. Three years later he joined Baker Hughes in the position of Wireline Field Engineer. In 2008 he became the Baker Hughes Wireline Operations Manager for South Europe and directed numerous wireline data acquisition projects in the area for major Oil & Gas companies such as ExxonMobil, ENI, Noble Energy and others. From 2012 to 2017 he assumed the position of Senior Geoscientist with Baker Hughes, where he specialized in Cased Hole Formation Evaluation, Cased Hole Integrity Services and Formation Testing and Sampling. In 2018 he joined Hellenic Hydrocarbons Resources Management in the capacity of Drilling Engineer in the company's Offshore Hydrocarbon Operations Department.
